

REPTICARE®

INFRARED HEAT PROJECTOR

PROFESSIONAL SERIES

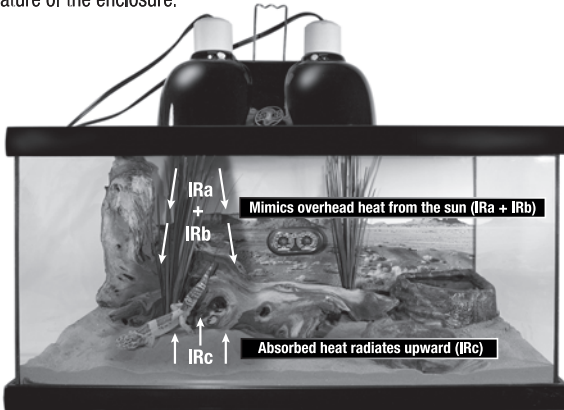

ITEM# DH-35,
DH-60, DH-100
& DH-150

INSTRUCTIONS

Congratulations on the purchase of your new ReptiCare® Infrared Heat Projector. This technology is the most natural way to bring sun-like heat into your pet's terrarium or paludarium. Please read through this brief instruction manual to familiarize yourself with the heater and its safe use.

Zoo Med's ReptiCare® Infrared Heat Projector mimics the sun by producing the same Infrared A and Infrared B wavelengths. These deep-penetrating wavelengths are energy-rich and make their way into an animal's body, warming them to their core and aiding in thermoregulation, digestion, egg development, and shedding.

Your pet, and the rocks, décor, and substrate in their environment will all absorb these energy-rich IRa and IRb wavelengths. These items in their habitat will re-radiate heat back into their environment through convection (IRc), which will warm your pet's belly and the air above them, thereby increasing the ambient temperature of the enclosure.

These wavelengths provide heat in the most natural way possible: through direct and overhead IRa and IRb wavelengths (just like the sun would provide in the wild), as well as heat from below radiating upward from the rocks and décor, (warming their underside with IRc).

The thick glass reflector that encases this bulb helps direct these wavelengths in a wide, safe, and efficient manner. When used appropriately, these long-lived heaters should provide you and your pet with years of use.

The carbon heating element only emits a faint glow and produces almost no visible light, these heaters are safe to use day or night and will not disrupt your pet's sleep cycle. We highly recommend using this product in conjunction with a dimming-type thermostat, such as Zoo Med's Environmental Control Center (Item# RT-1000), which will also allow you to program a desired daytime and nighttime temperature appropriate for your species.

ITEM# RT-1000

INSTRUCTIONS:

Use an appropriate sized Infrared Heat Projector for your terrarium. 35w, 60w, and 100w heaters can be installed in the fixtures below:

ITEM# LF-18

ITEM# LF-19

ITEM# LF-10

The 150W heater can be installed in any of the fixtures below:

ITEM# LF-17

ITEM# LF-25

ITEM# LF-10

Securely mount the lamp fixture containing the Heat Projector above your terrarium's screen cover in a place out of reach of children and pets. For additional security, consider using Zoo Med's Reptile Lamp Stand (Item# LF-20).

You must have a screen or some type of barrier between the heater and the inside of the enclosure; never mount a heat source inside of an enclosure because this is a serious fire and burn hazard. Note: radiant heat sources, like lamps and Infrared Heat Projectors should not be placed above a glass cover, as this can cause glass fractures.

Infrared Heat Projectors get very hot; do not allow children or pets to touch the heater or the fixture that it is screwed into, as this may result in burns.

ITEM# LF-20

WARNINGS:

- Use the ReptiCare® Infrared Heat Projector in appropriately rated lamp fixtures.
- **KEEP OUT OF REACH OF CHILDREN.**
- Do not place inside enclosures or terrariums.
- Keep the heater away from curtains or other highly flammable objects.
- Make sure your heater is securely mounted or suspended above your terrarium using Zoo Med's Reptile Lamp Stand.
- For indoor use only.
- For reptile use only.
- Save these instructions!

WARRANTY:

Zoo Med Laboratories, Inc. (Zoo Med) warrants each ReptiCare® Infrared Heat Projector to be free of defects in material and workmanship under normal use and service for 12 calendar months. The obligation under this warranty is limited to the repair or replacement, at Zoo Med's discretion, of the product or any part thereof, when the product is returned to Zoo Med, freight prepaid. No claim shall be allowed under this warranty if, in the opinion of Zoo Med, the ReptiCare® Infrared Heat Projector has been subject to accident or improper usage, including but not limited to: water damage, improper storage, accidental dropping, etc. This warranty is in lieu of all other warranties and representations express or implied. Please include your receipt, full name, address, phone number, and email address along with a note explaining failure when sending any product back to Zoo Med. Please allow 4 to 6 weeks for repair or replacement.
